A day's work was rewarded with £5 in pocket money. She says: "I'm sure I wasn't much of a help to start with painting the rooms and putting down the flooring throughout the house. I was about 13 when an uncle gave me a copy of Jostein Gaarder's *Sophie's World*. It was full of ideas that were new to me, so I spent the summer with my head in and out of that book. It spoke to me and brought me into a world of philosophy(哲学).

That love for philosophy lasted until I got to college. Nothing kills the love for philosophy faster than people who think they understand Foucault, Baudrillard, or Confucius better than you—and then try to explain them.

Eric weiner's *The Socrates Express: In Search of Life Lessons from Dead Philosophers* reawakened my love for philosophy. It is not an explanation, but an invitation to think and experience philosophy.

Weiner starts each chapter with a scene on a train ride between cities and then frames each philosopher's work in the centext(背景) of one thing they can help us do better. The end result is a read in which we learn to wonder like Socrates, see like Thoreau, listen like Schopenhauer, and have no regrets like Nietzsche. This, more than a book about understanding philosophy, is a book about learning touse philosophy to improve a life.

He makes philosophical thought an appealing exercise that improves the quality of our experiences, and he does so with plenty of humor. Weiner enters into conversation with some of the most important

philosophers in history, and he becomes part of that crowd in the process by decoding(解读) their messages and adding his own interpretation.

The Socrates Express is a fun, sharp book that draws readers in with its apparent simplicity and gradually pulls them in deeper thoughts on desire, loneliness, and aging. The invitation is clear: Weiner wants you to pick up a coffee or tea and sit down with this book. I encourage you to take his offer. It's worth your time, even if time is something we don't have a lot of.

8. Who opened the door to philosophy for the author?

- A. Foucault.
- B. Eric Weiner.
- C. Jostein Gaarder
- D. A college teacher.

9. Why does the author list great philosophers in paragraph 4?

- A. To compare Weiner with them.
- B. To give examples of great works.
- C. To praise their writing skills.
- D. To help readers understand Weiner's book.

10. What does the author like about The Socrates Express?

- A. Its views on history are well-presented.
- B. Its ideas can be applied to daily life.
- C. It includes comments from readers.
- D. It leaves an open ending.

11. What does the author think of Weiner's book?

- A. Objective and plain.
- B. Daring and ambitious.
- C. Serious and hard to follow.
- D. Humorous and straightforward

Grizzly bears, which may grow to about 2.5m long and weigh over 400kg, occupy a conflicted corner of the American psyche-we revere(敬畏) them even as they give us frightening dreams. Ask the tourists from around the world that flood into Yellowstone National Park what they most hope to see, and the answer is often the same: a grizzly bear.

"Grizzly bears are re-occupying large areas of their former range," says bear biologist Chris Servheen. As grizzly bears expand their range into places where they haven't been seen in a century or more, they're increasingly being sighted by humans.

The western half of the U.S. was full of grizzlies when Europeans came, with a rough number of 50,000

or more living alongside Native Americans. By the early 1970s, after centuries of cruel and continuous hunting by settlers, 600 to 800 grizzlies remained on a mere 2 percent of their former range in the Northern Rockies. In 1975, grizzlies were listed under the Endangered Species Act.

Today, there are about 2,000 or more grizzly bears in the U.S. Their recovery has been so successful that the U.S. Fish and Wildlife Service has twice attempted to de-list grizzlies, which would loosen legal protections and allow them to be hunted. Both efforts were overturned due to lawsuits from conservation groups. For now, grizzlies remain listed.

Obviously, if precautions(预防) aren't taken, grizzlies can become troublesome, sometimes killing farm animals or walking through yards in search of food. If people remove food and attractants from their yards and campsites, grizzlies will typically pass by without trouble. Putting electric fencing around chicken houses and other farm animal quarters is also highly effective at getting grizzlies away. "Our hope is to have a clean, attractant-free place where bears can pass through without learning bad habits," says James Jonkel, longtime biologist who manages bears in and around Missoula.

12. How do Americans look at grizzlies?

- A. They cause mixed feelings in people.
- B. They should be kept in national parks.
- C. They are of high scientific value.
- D. They are a symbol of American culture.

13. What has helped the increase of the grizzly population?

- A. The European settlers' behavior.
- B. The expansion of bears' range.
- C. The protection by law since 1975.
- D. The support of Native Americans.

14. What has stopped the U. S. Fish and Wildlife Service from de-listing grizzlies?

- A. The opposition of conservation groups.
- B. The successful comeback of grizzlies.
- C. The voice of the biologists.
- D. The local farmers' advocates.

15. What can be inferred from the last paragraph?

- A. Food should be provided for grizzlies.

- B. People can live in harmony with grizzlies.
- C. A special path should be built for grizzlies.
- D. Technology can be introduced to protect grizzlies.

Tricks To Becoming A Patient Person

Here's a riddle: What do traffic jams, long lines and waiting for a vacation to start all have in common?

There's one answer. 16.

In the Digital Age, we're used to having what we need immediately and right at our fingertips. However, research suggests that if we practiced patience, we'd be a whole lot better off. Here are several tricks.

•Practice gratitude(感激)

Thankfulness has a lot of benefits: Research shows it makes us happier, less stressed and even more optimistic. 17. "Showing thankfulness can foster self-control," said Ye Li, researcher at the University of California.

•Make yourself wait

Instant gratification(满足) may seem like the most "feel good" option at the time, but psychology research suggests waiting for things actually makes us happier in the long run. And the only way for us to get into the habit of waiting is to practice. 18. Put off watching your favorite show until the weekend or wait 10 extra minutes before going for that cake. You'll soon find that the more patience you practice, the more you start to apply it to other, more annoying situations.

• 19.

So many of us have the belief that being comfortable is the only state we will tolerate, and when we experience something outside of our comfort zone, we get impatient about the circumstances. You should learn to say to yourself, "20." You'll then gradually become more patient.

- A. Find your causes
- B. Start with small tasks
- C. Accept the uncomfortable
- D. All this adds up to a state of hurry
- E. It can also help us practice more patience
- F. This is merely uncomfortable, not intolerable
- G. They're all situations where we could use a little extra patience
